

ENVIRONMENTAL POLICY (DRAFT)

ASP Industries is an established screen printing / design company. Our main services include the printing of garments, design and the sourcing of products for event branding. We recognise that our operations result in emissions to air and water and the generation of waste. It is our aim to reduce the environmental impacts of our business and operate in a responsible manner.

Our environmental policy applies to all aspects of our operation including management, production, delivery and procurement.

ASP Industries will comply with all regulatory and legislative requirements as a minimum level of performance. We will also ensure that the company has the resources available to achieve our objectives and aims.

Our objectives in 2007 are to continually improve our environmental performance. This will be achieved by:

- The monitoring and minimisation of the consumption of energy and water where possible
- Minimising, re-using and recycling waste where possible
- Maintaining an environmental management system that complies with BS8555 and enable objectives and targets to be established and implemented
- To reduce solvent consumption in the screen cleaning process. To reduce the emission of volatile organic compounds (VOC's)
